

Lead Partners (Capture, sell or exchange leads)

Can I import my lists of service providers?

Yes. Do.Chat recommend that marketers and lead partners import their lists of service providers to allow for higher lead sales and conversion rates. Do.Chat has a database of intergraded suppliers in all industries that ensures profitability in lead sales. Lead Partners who are the first to import specific suppliers or service professional will be linked as the source or referral ID of the service provider. This means that all price or quote requests directly received from such service provider or their staff will generate an income for the lead partner. This offers a huge long-term financial benefit to lead partners who list suppliers and service providers first.
